

GameSpice App

Play, mod and host your games from one app.

Play

GameSpice App

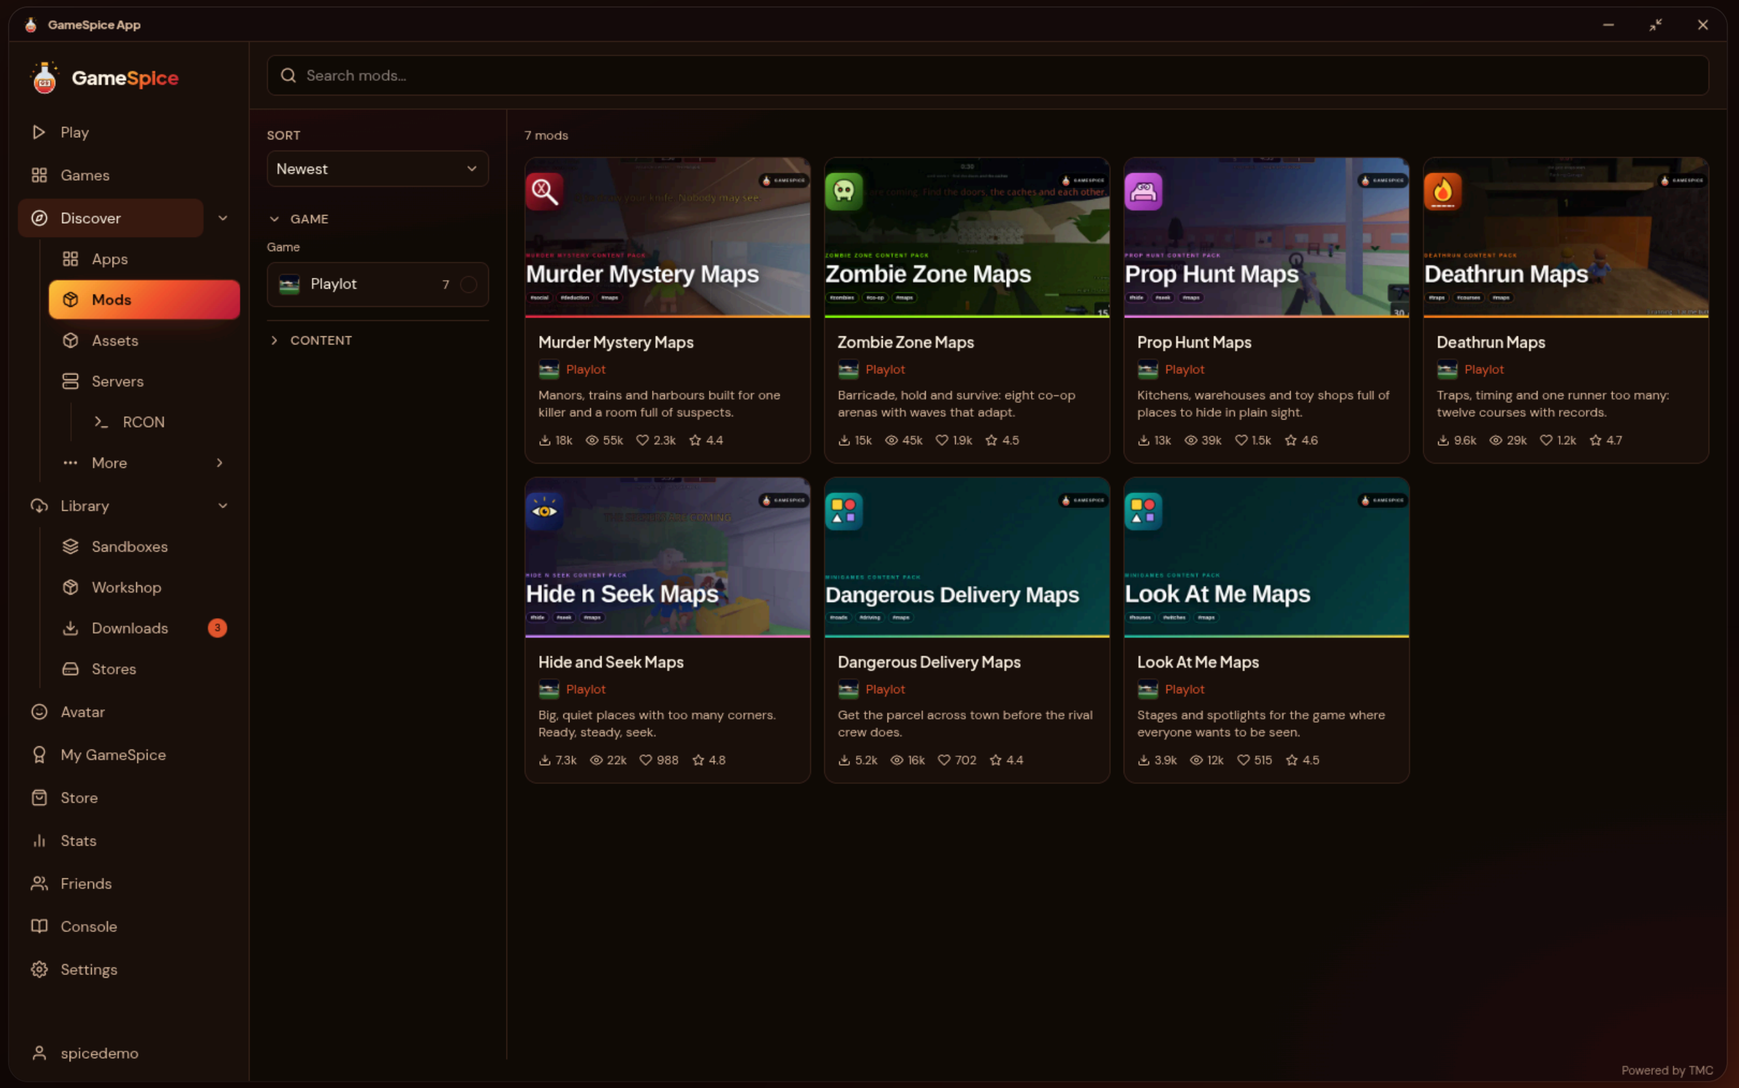

Your games, sandboxes and friends online, one click from launch.

Discover mods

GameSpice App

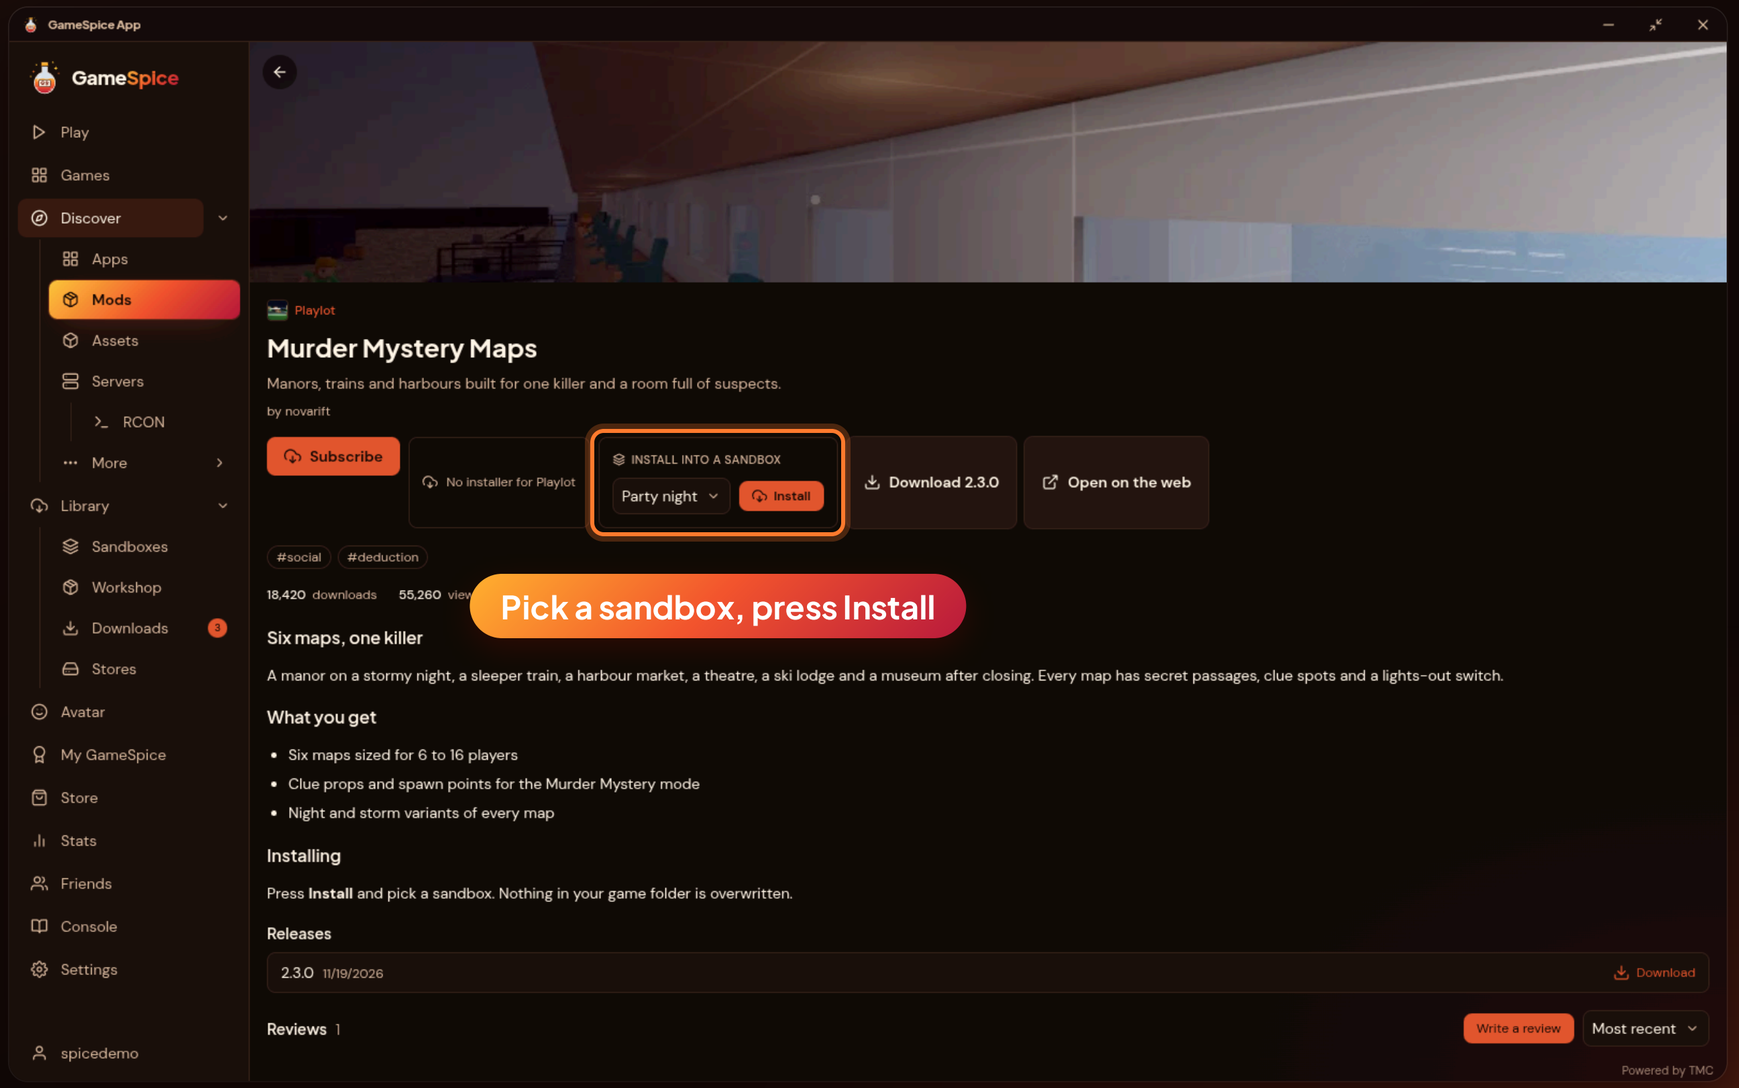

Browse maps, mods and packs from every community.

Install in one click

GameSpice App

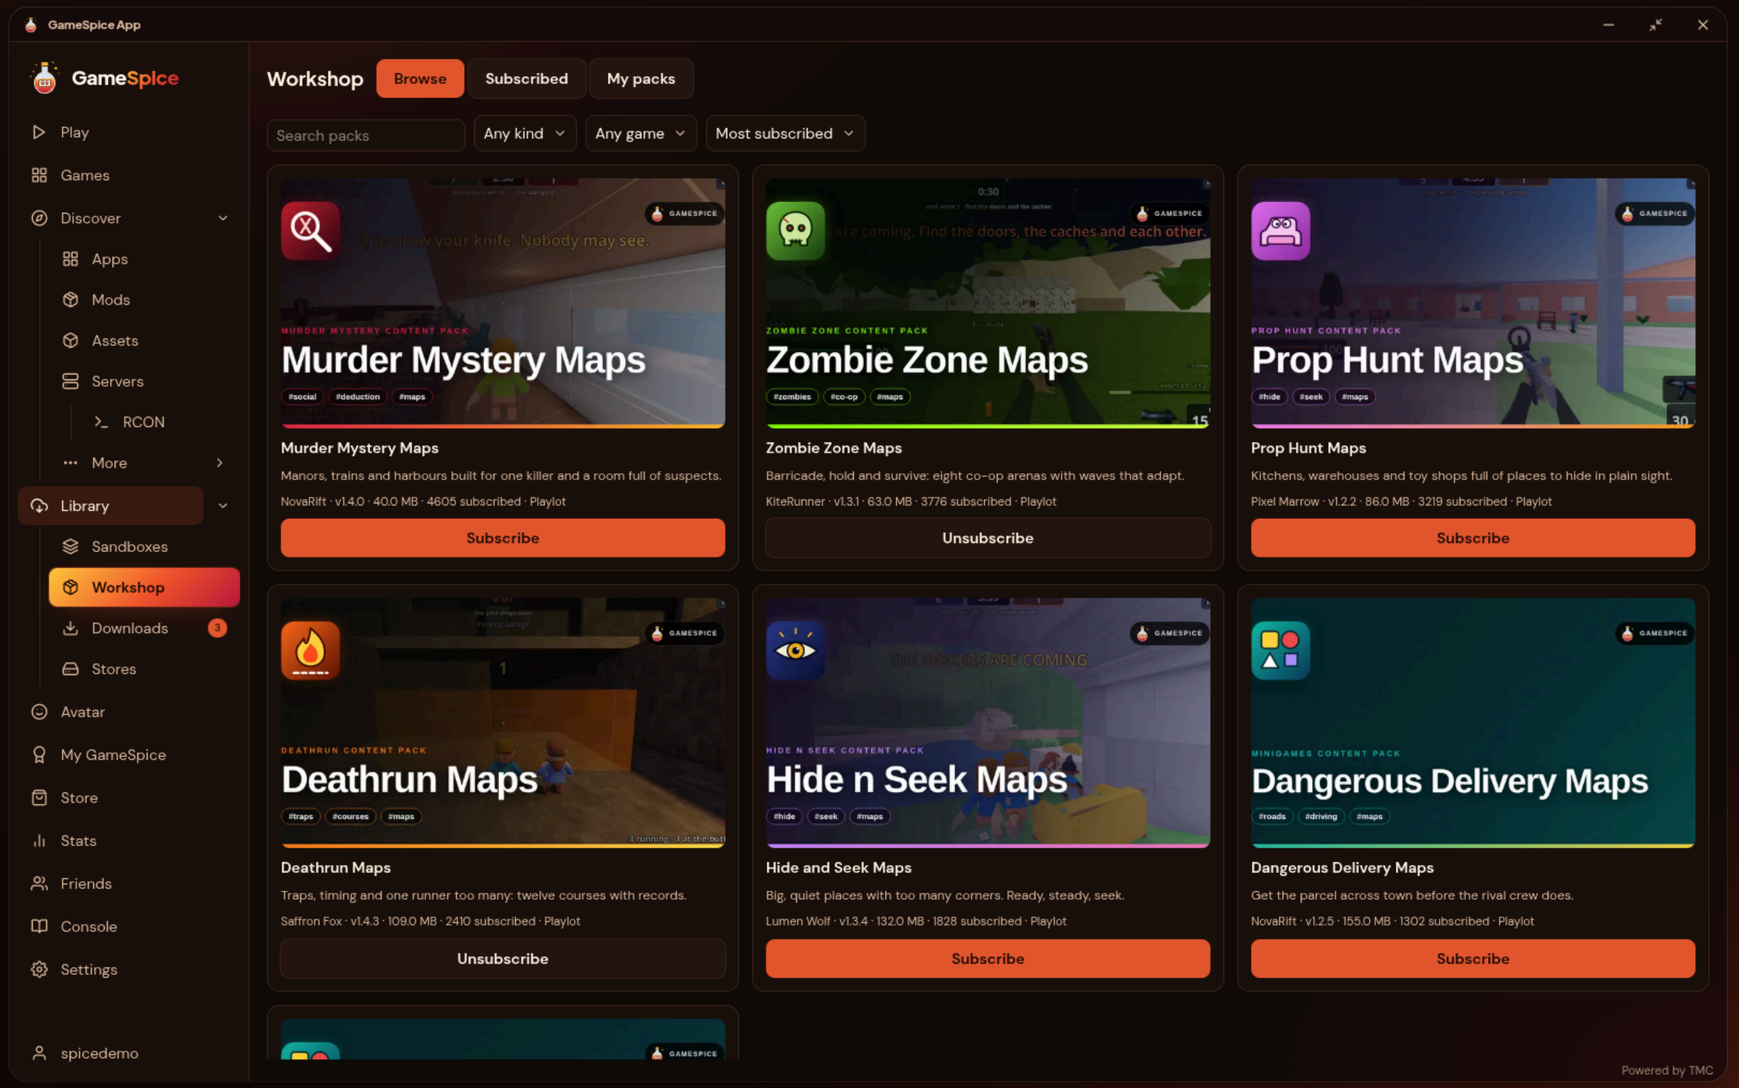

Every mod page shows what it changes and installs into the right sandbox.

Workshop

GameSpice App

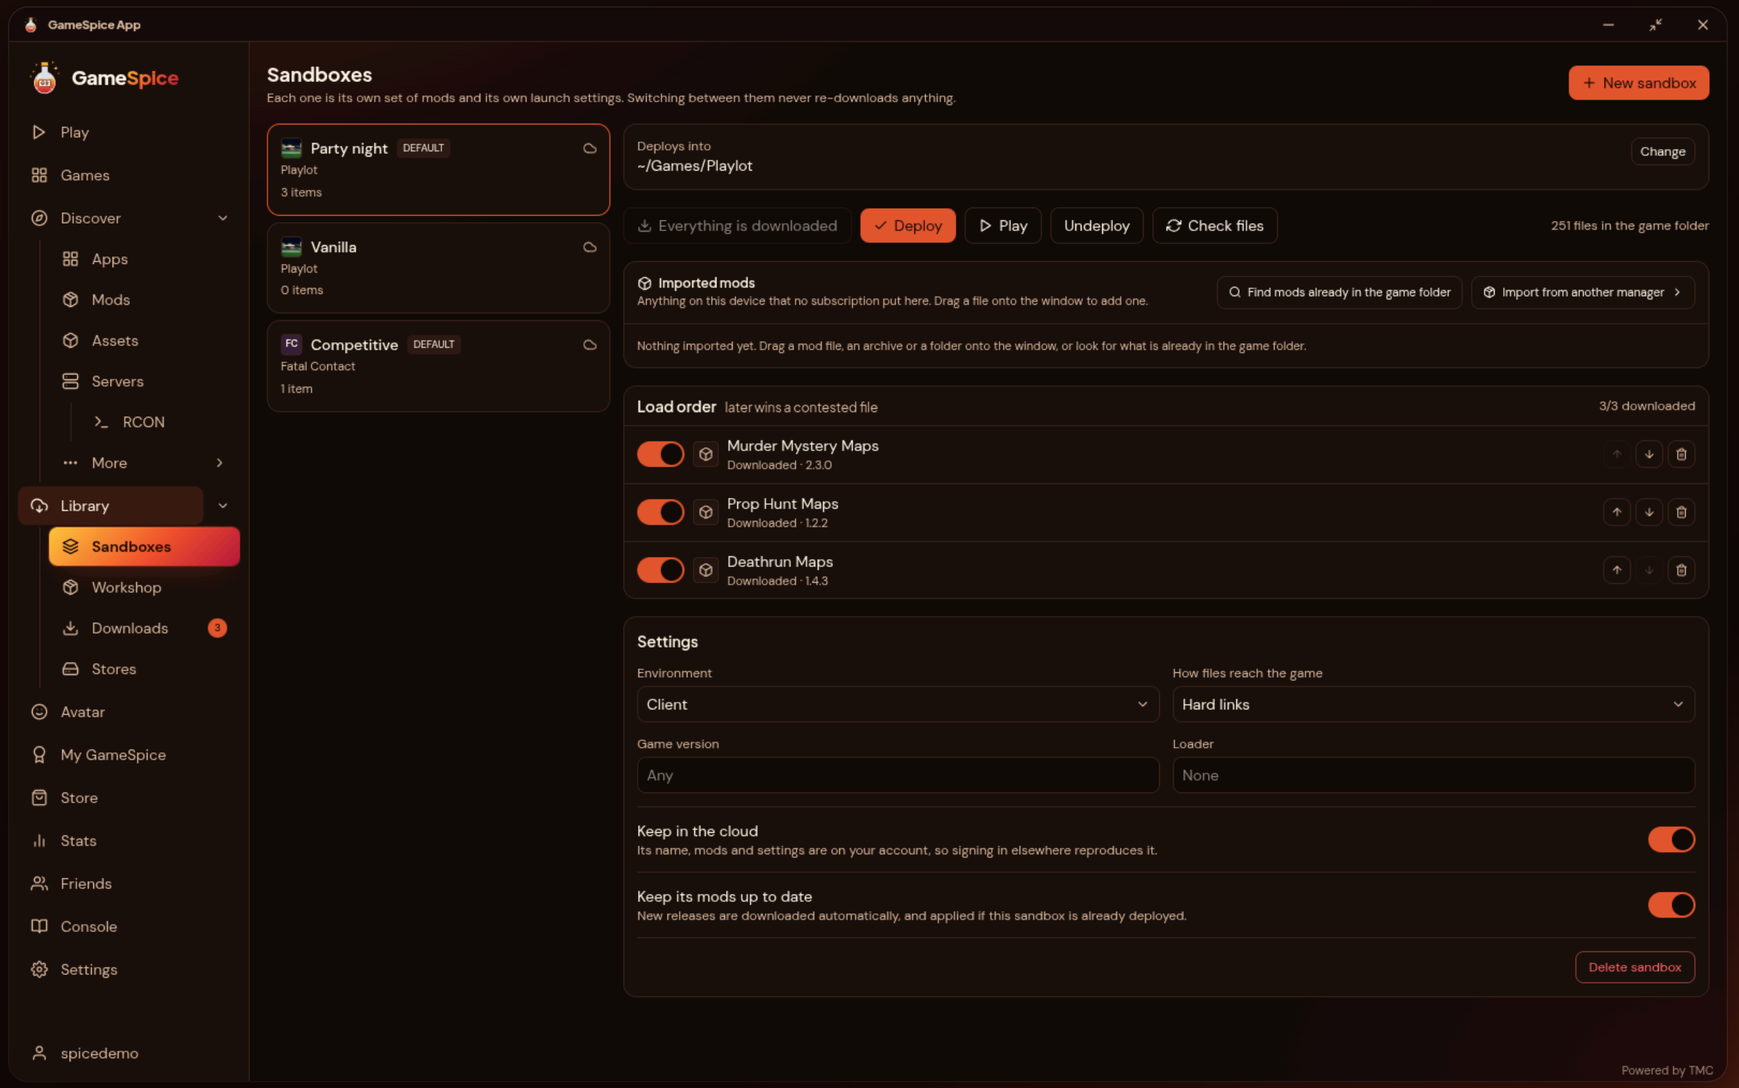

Publish your own maps and mods, with releases and changelogs.

Sandboxes

GameSpice App

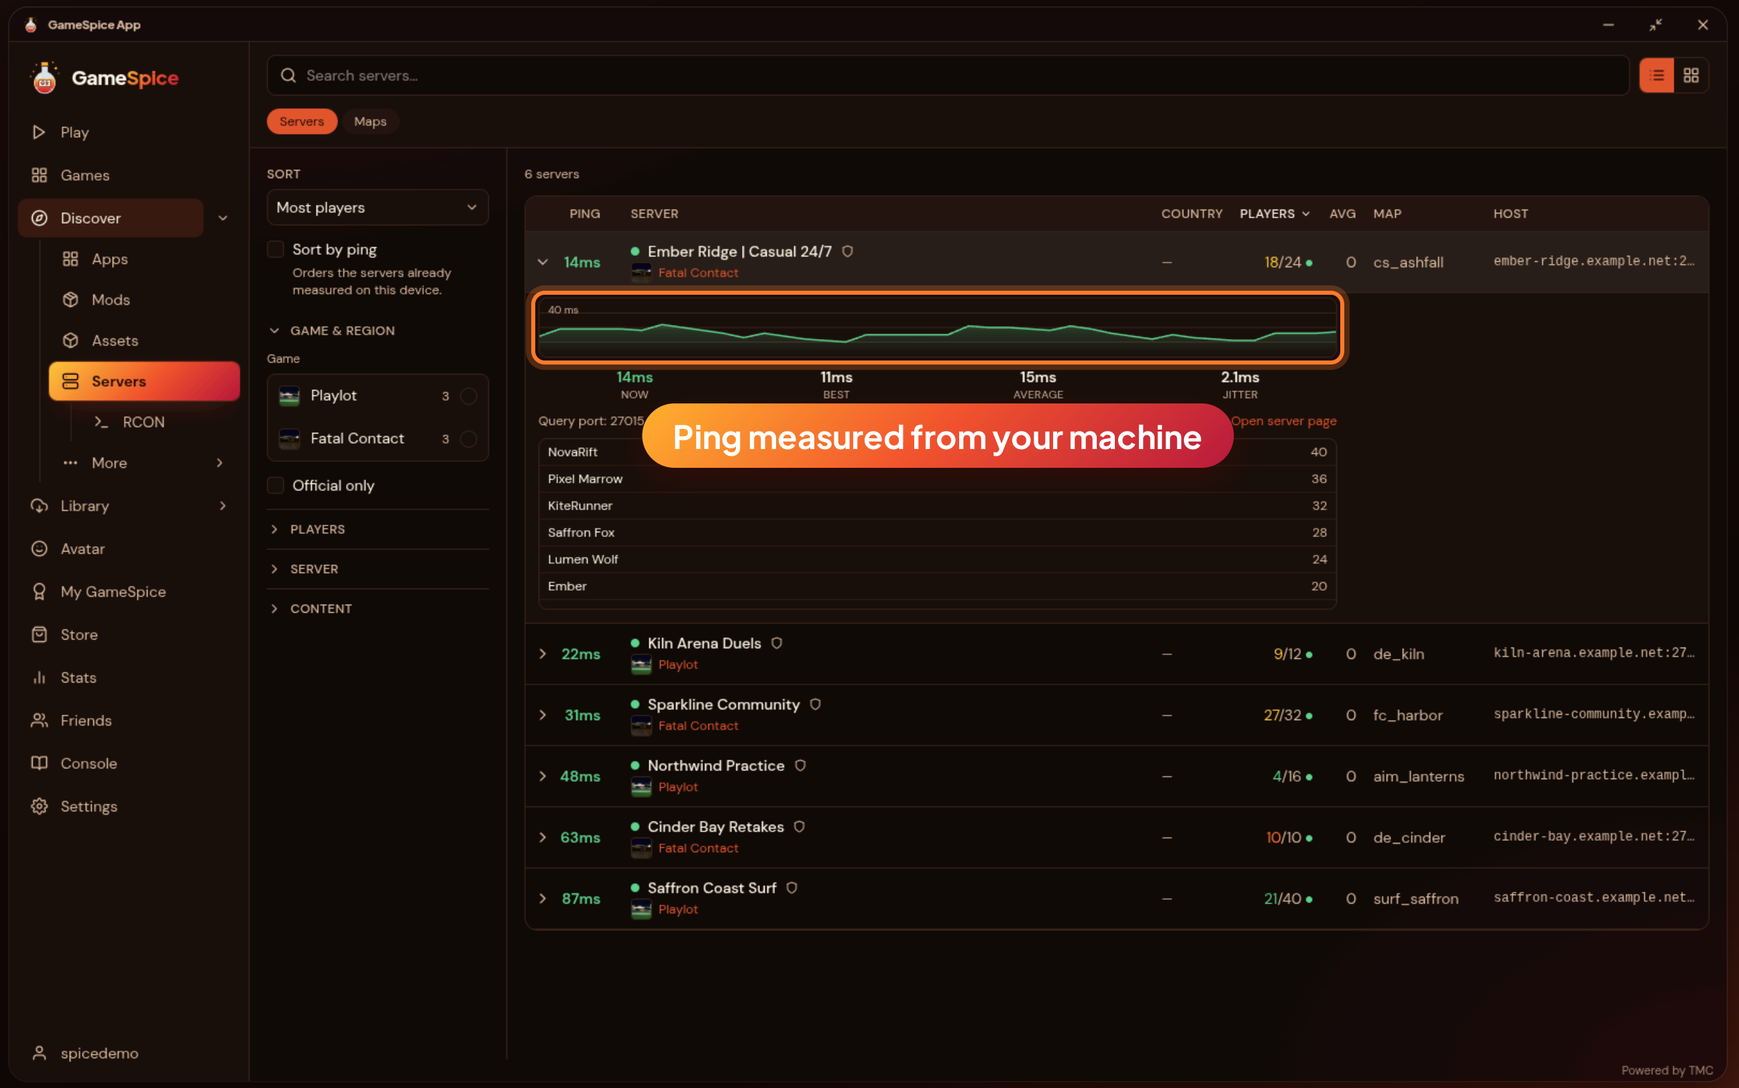

Keep mod sets apart: one game, as many setups as you like.

Servers with live latency

GameSpice App

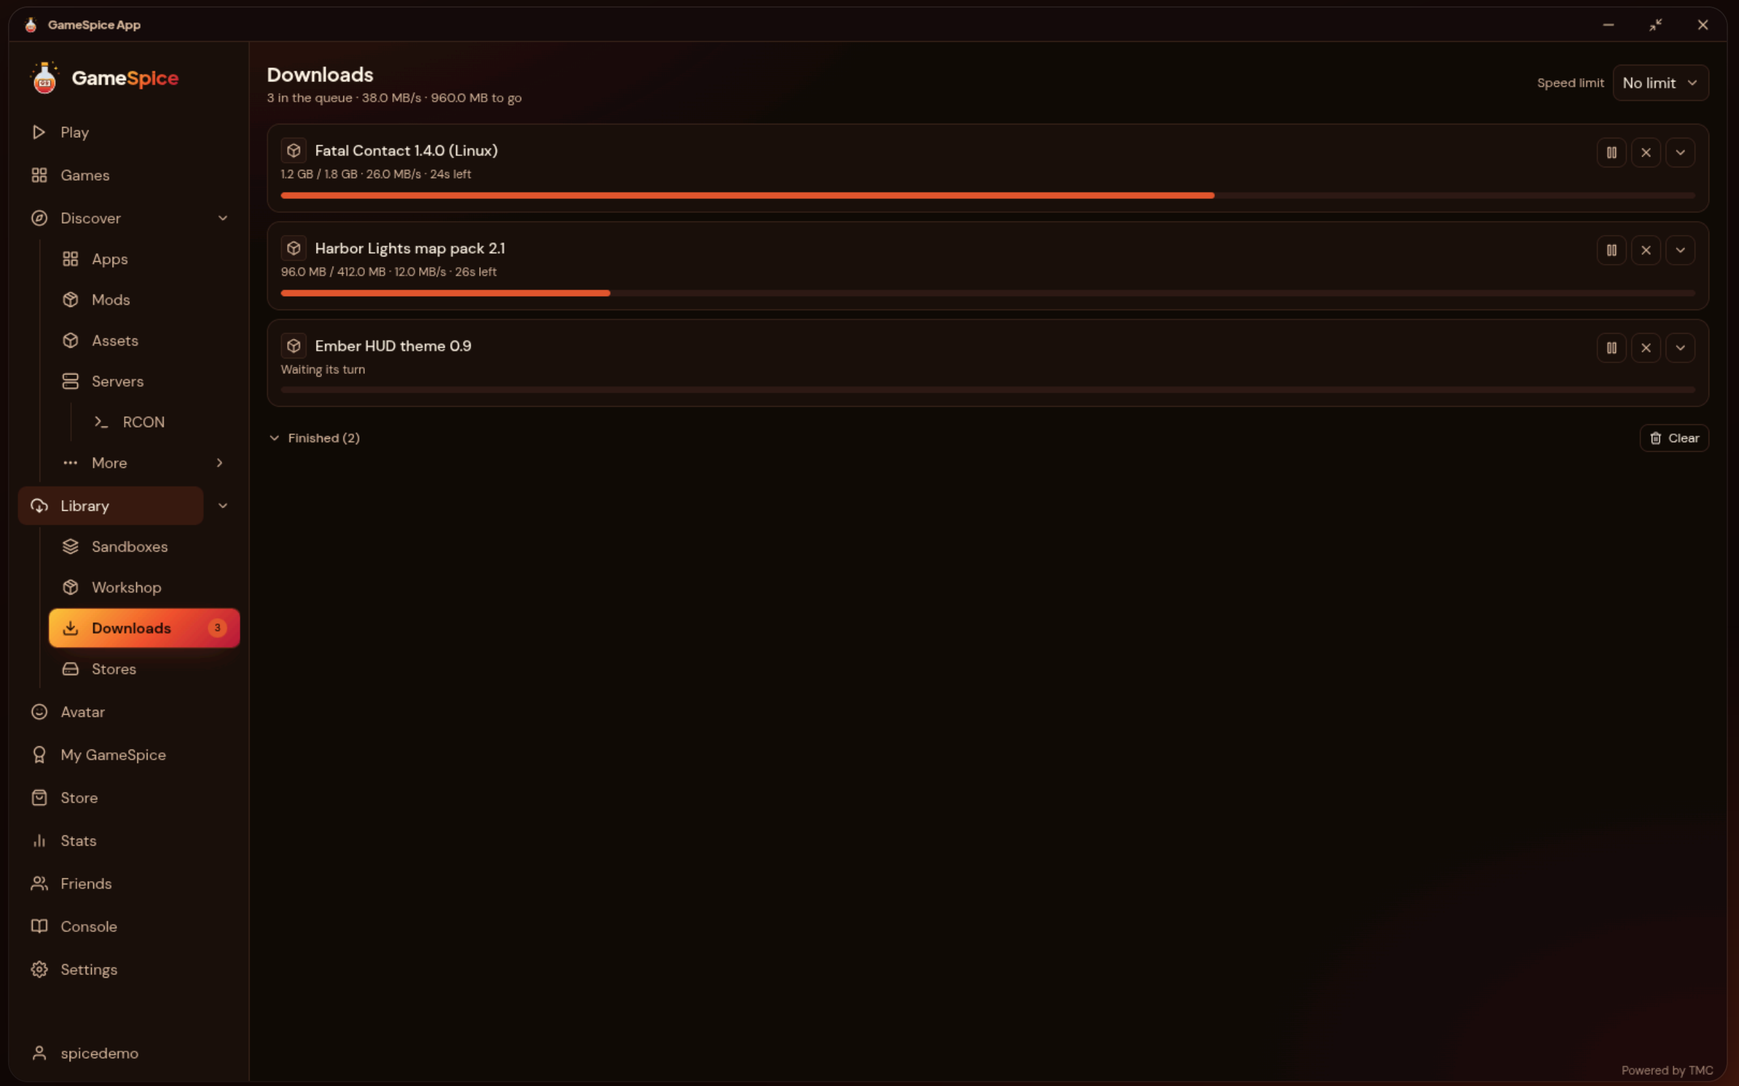

Real game queries and a running ping trace for every server.

Downloads

GameSpice App

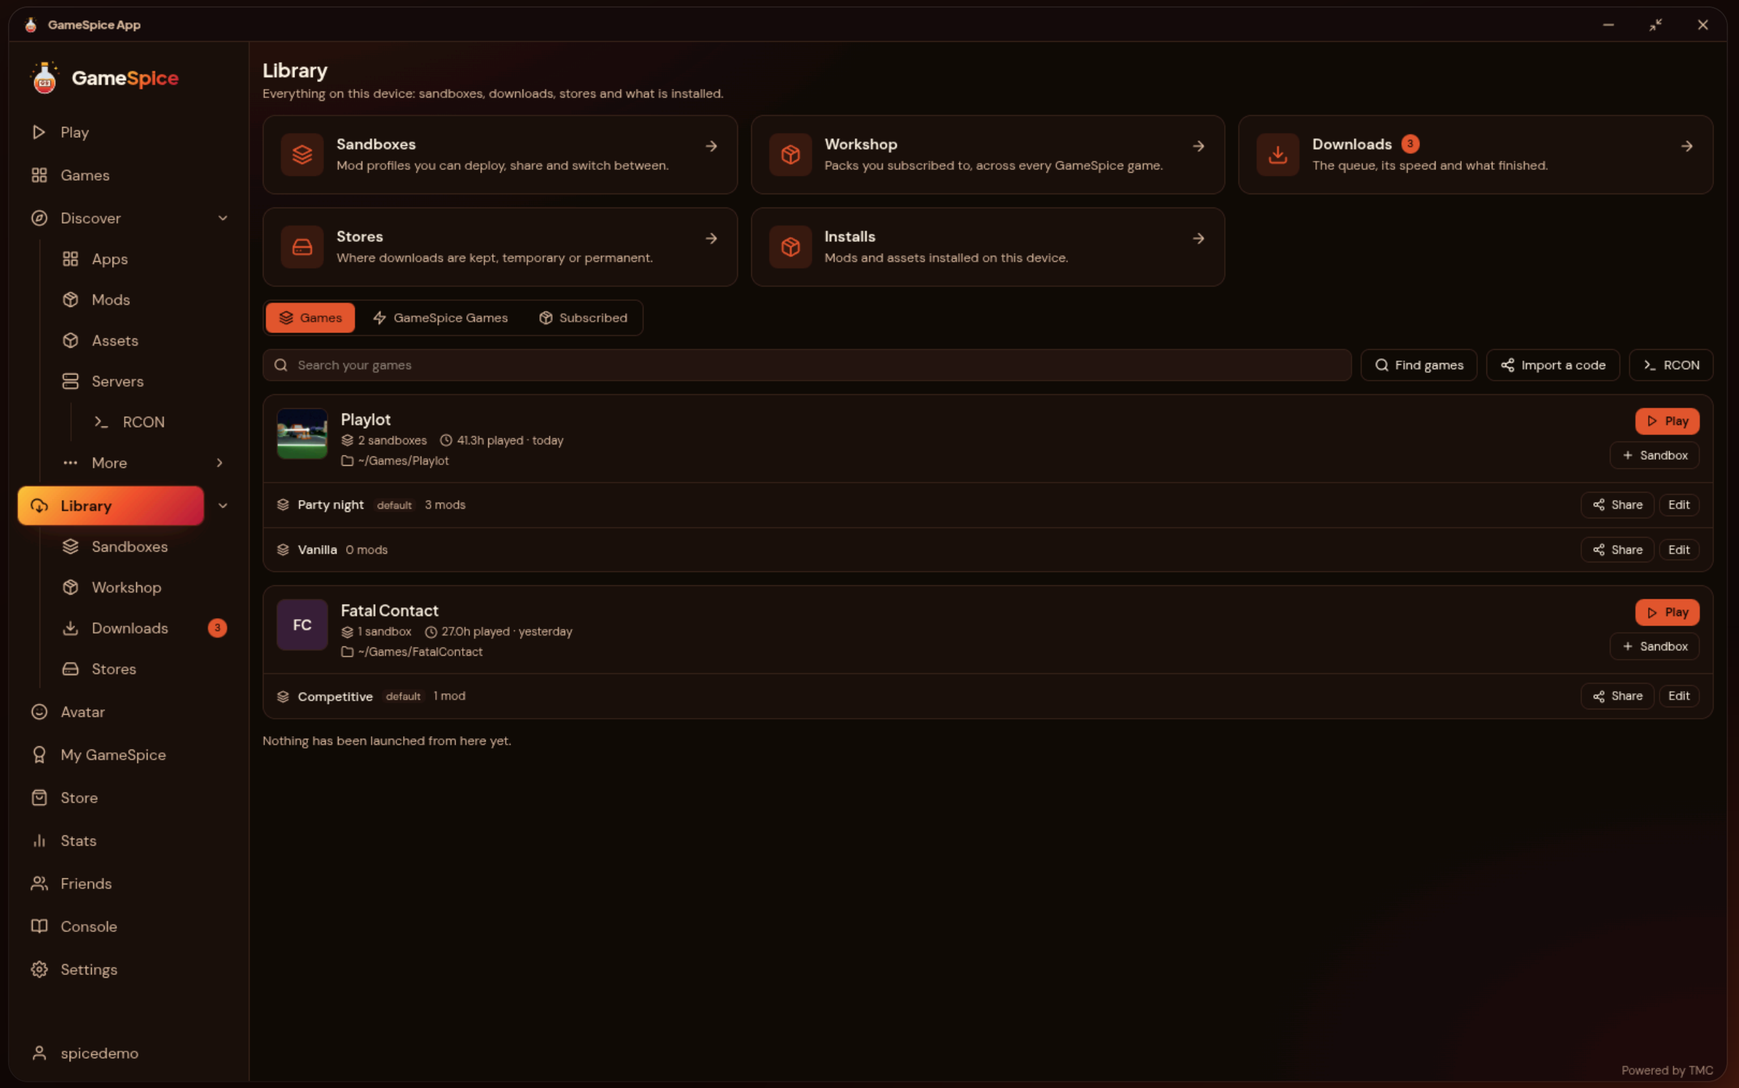

A queue you control: priorities, pauses and speed limits.

Library

GameSpice App

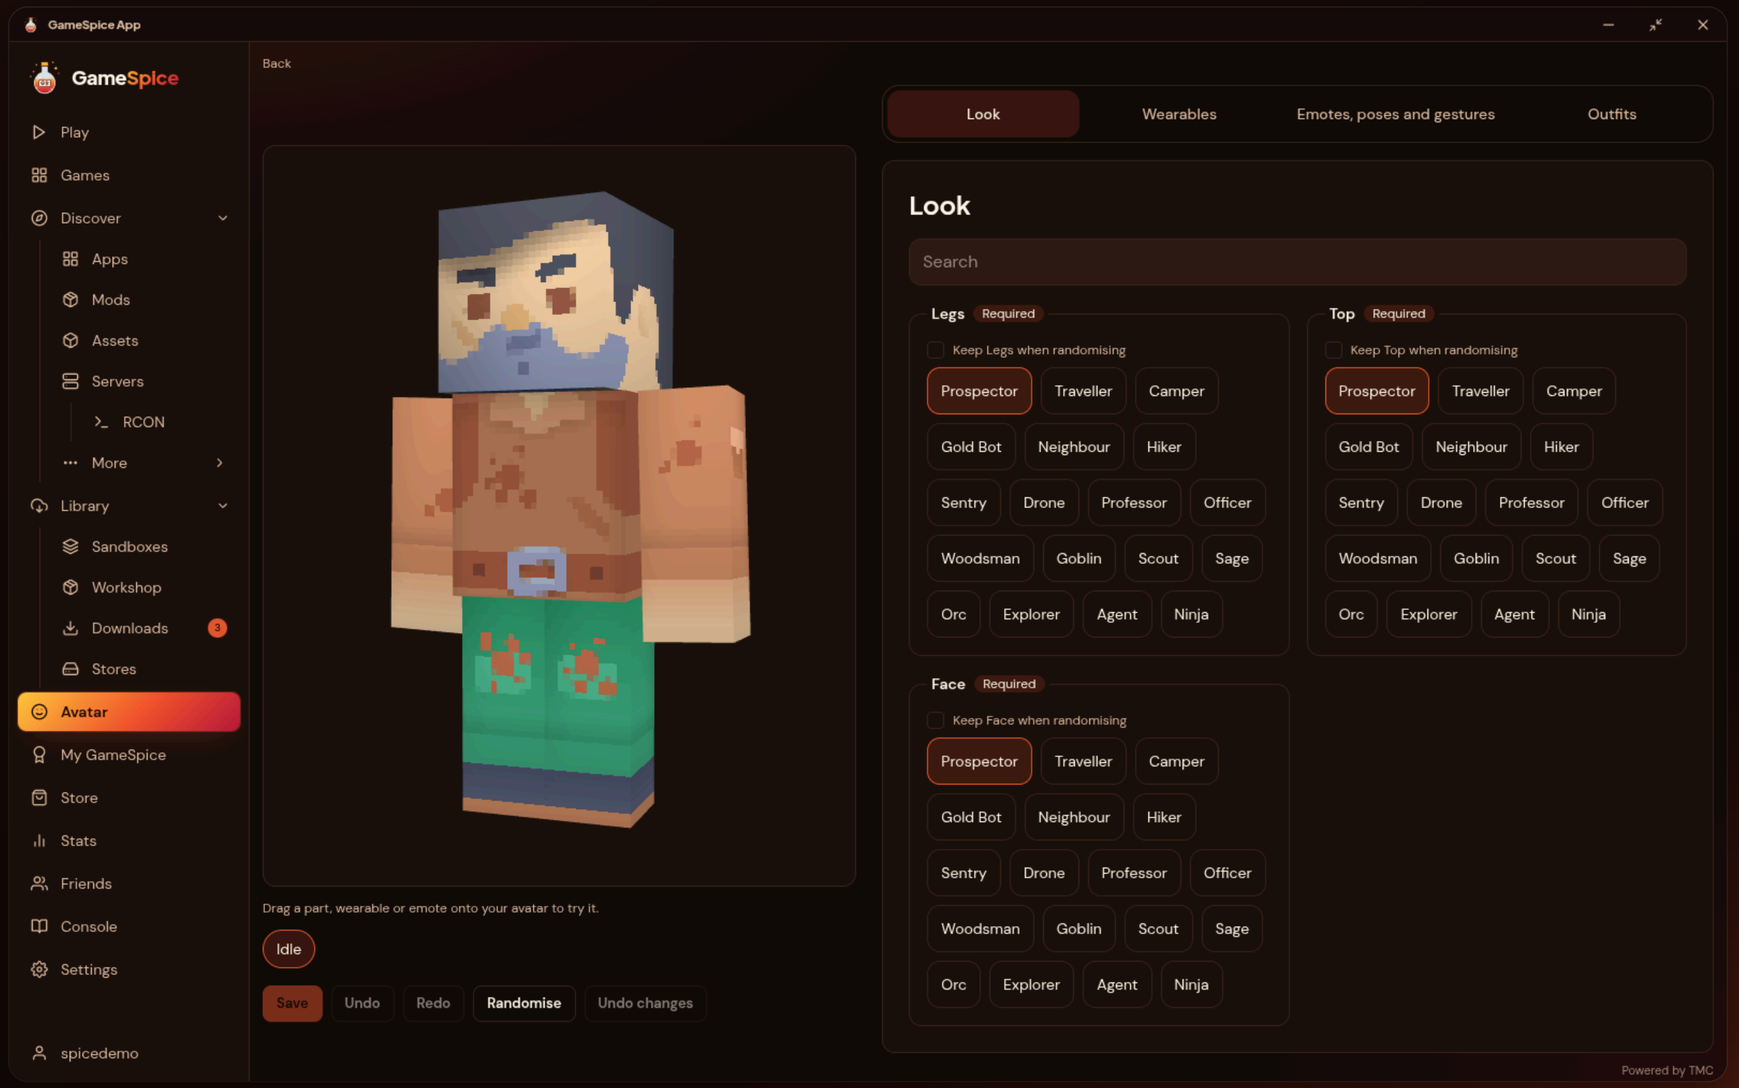

Installed mods stay up to date on their own.

Avatar studio

GameSpice App

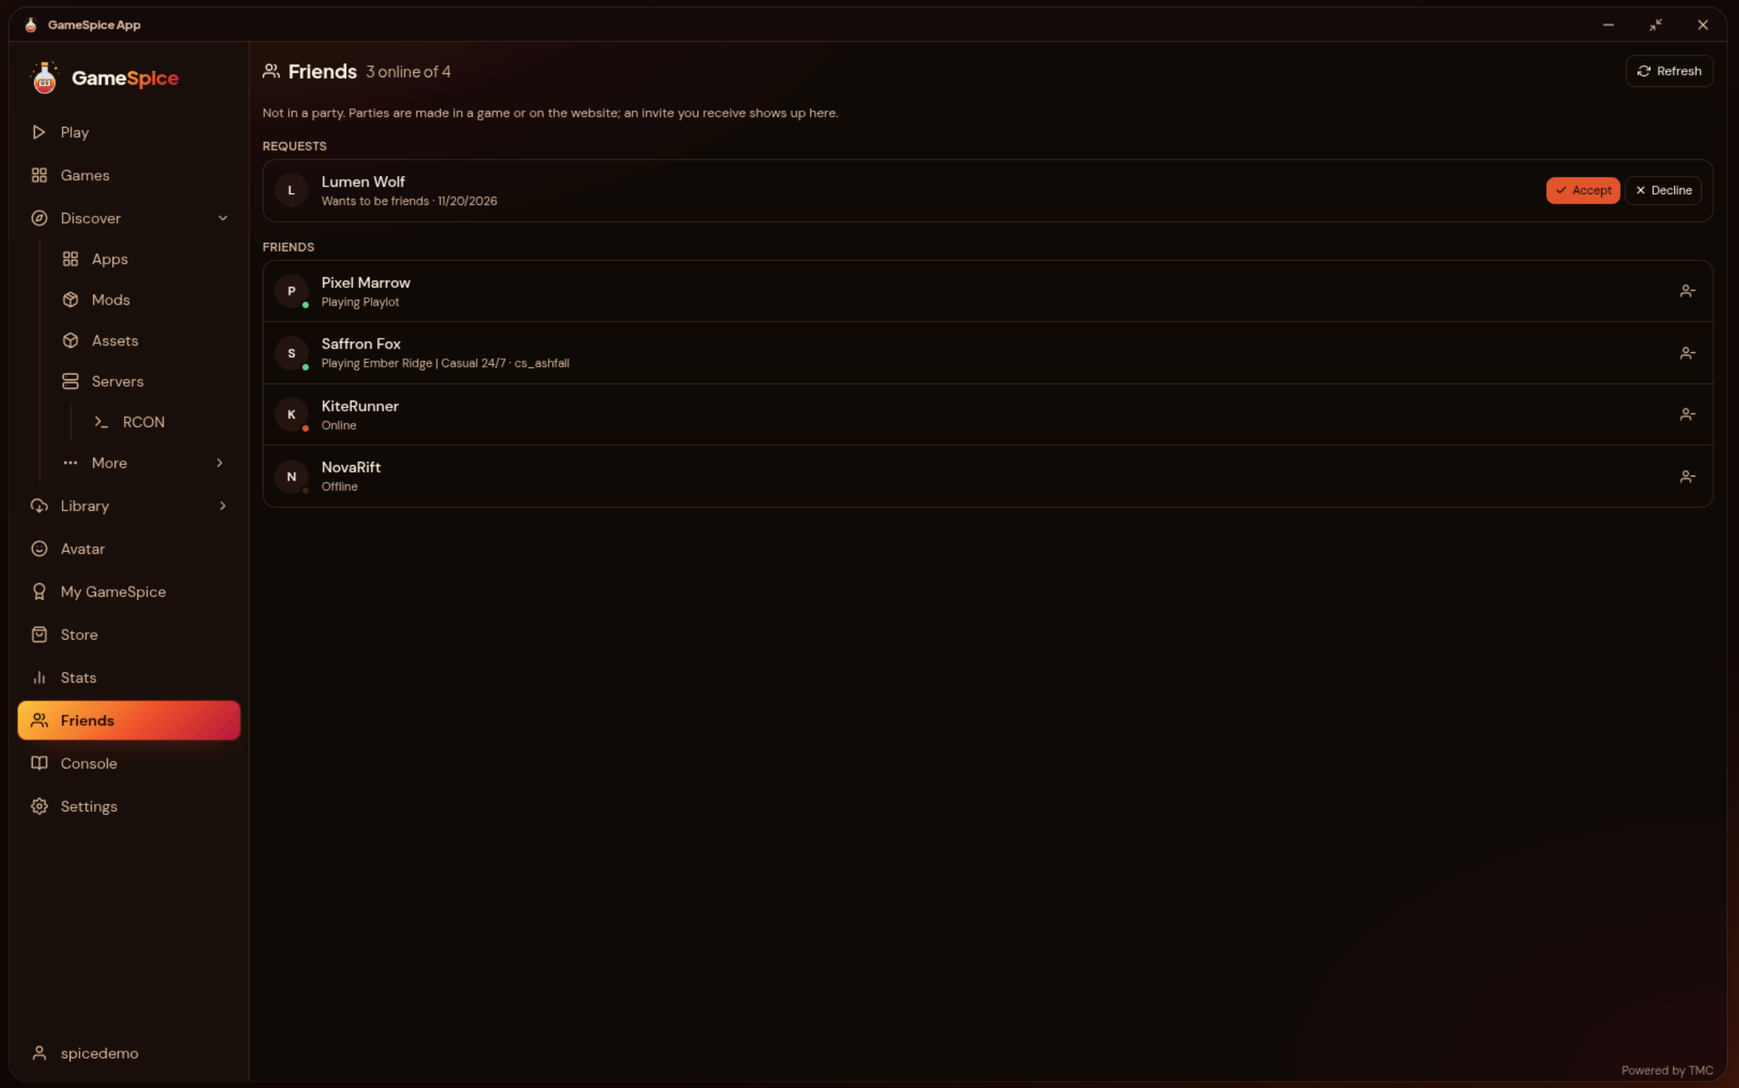

Build your look once and wear it in every game.

Friends

GameSpice App

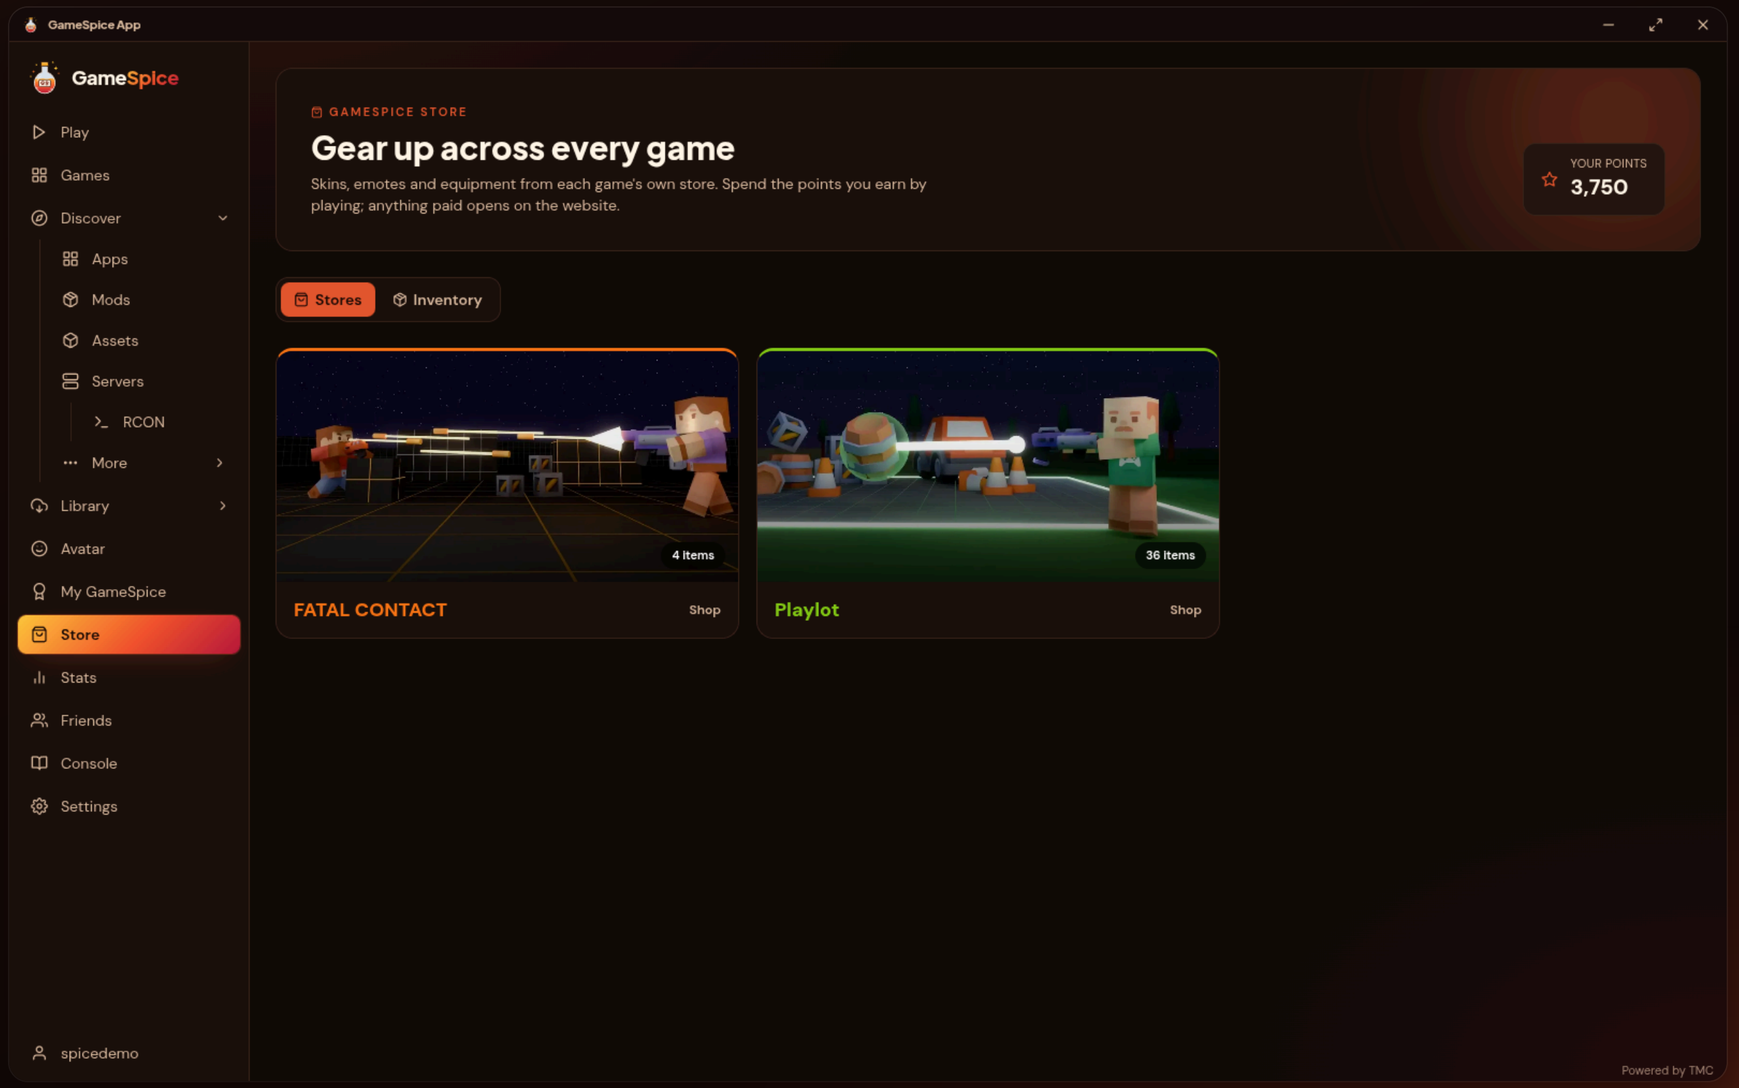

See who is online and what they are playing.

Store

GameSpice App

Every game's store: outfits, packs and points in one place.

Stats

GameSpice App

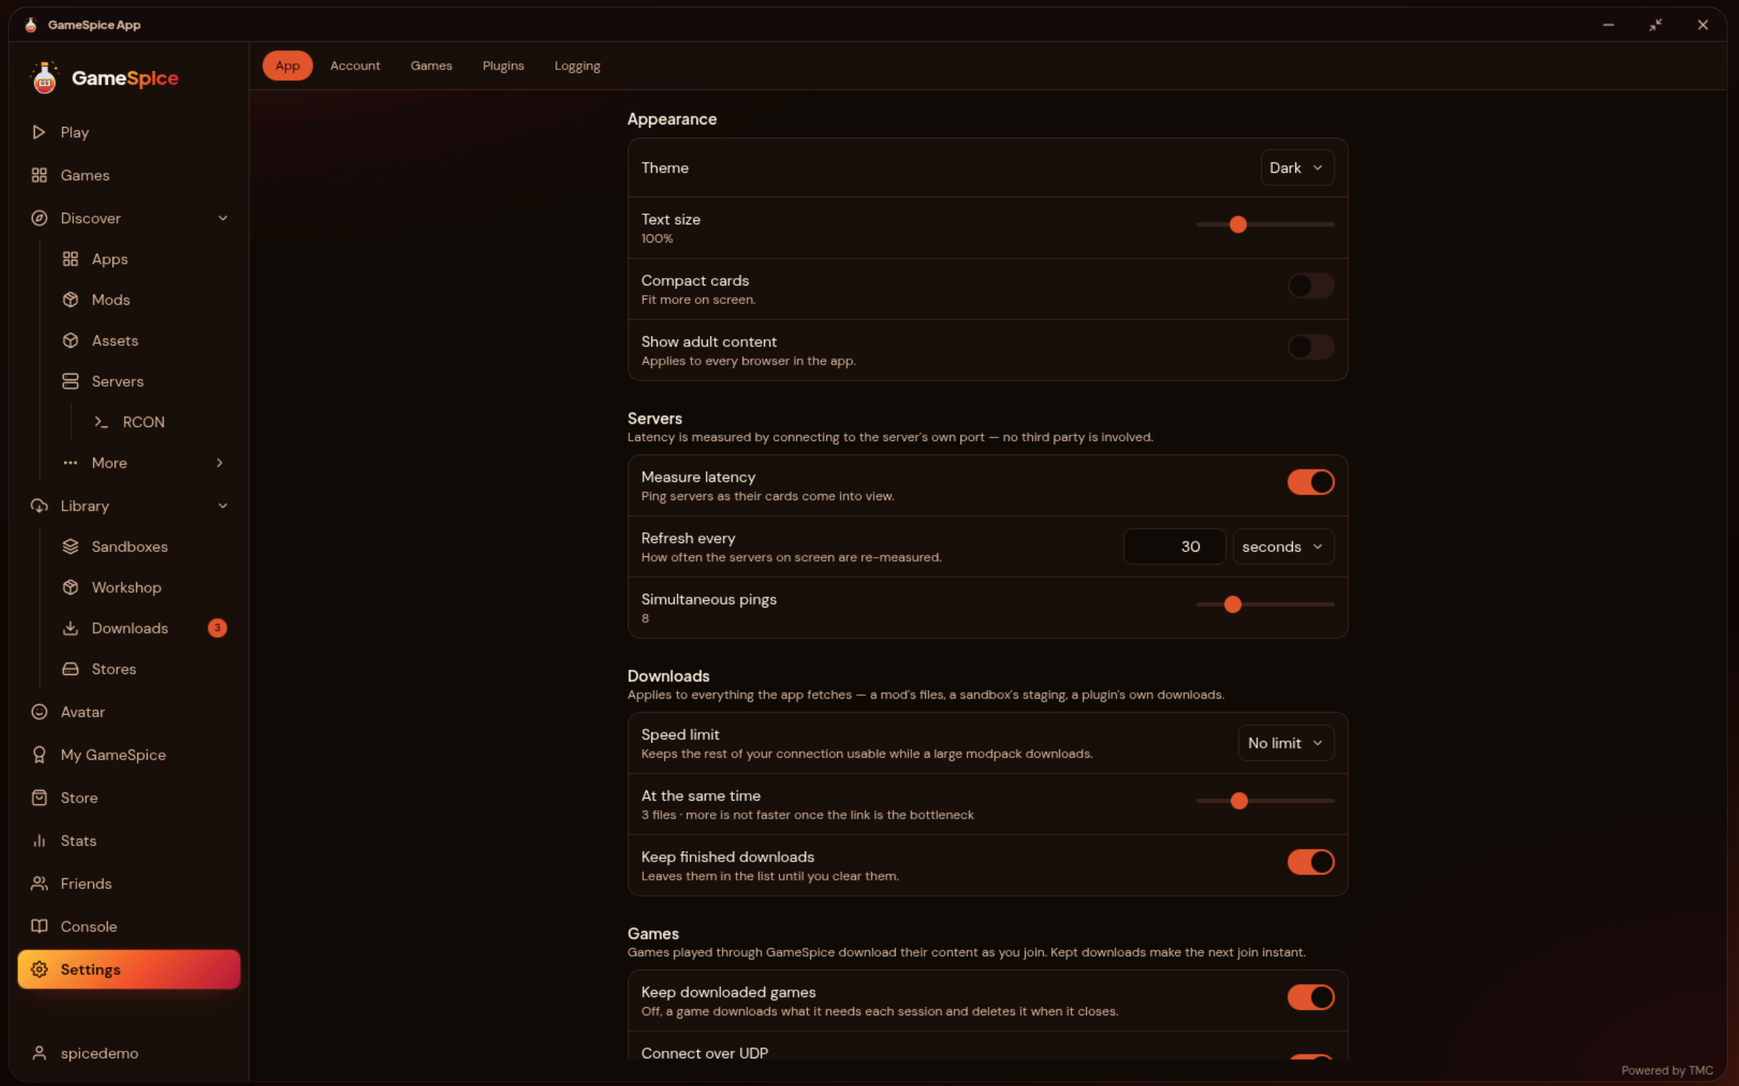

Your playtime and progress across games.

Settings

GameSpice App

Themes, folders, plugins and logging, all in one place.

Get the GameSpice App

Free for Windows and Linux at **gamespice.net/app**

Open any **gs://** link to jump straight to a game, mod or server.
